- Save Changes

• Cost – Cost of shipping a product
• Each Additional Item – Shipping cost for each additional item.

Note: Only admin will be able to add list of Countries, Shipping Companies and Processing Time for shipping.

Add a product - Step2:

On Step 2, Supplier has to fill up the following information about a product:

• Subtract Stock
• Track Inventory - If you want to track the inventory of the product.
• Alert Stock Level – Supplier can set an alert for stock level such that if alert stock level set to 5 then supplier will receive notification when stock level of a product reaches to 5 qty.
• YouTube Video – Define you tube link of a product
• Date Available
• Dimensions (L X W X H)
• Length Class
• Weight (Grams/Pound/Ounce)
• Status
• Display Order
• Product Filters
• Product Addons
Please find the screenshot below regarding the step 2:

![Screenshot of the product setup page](image-url)

### General
- **Subtract Stock**: Yes
- **Track Inventory**: Do not track
- **Alert Stock Level**:

### SEO
- **Youtube Video**:

### Options
- **Date Available**: 2016-08-29
- **Dimensions (L x W x H)**:
  - **Length**
  - **Width**
  - **Height**
- **Length Class**: Centimeter
- **Weight**: Weight
- **Weight Class**: Kilogram
- **Status**: Yes
- **Display Order**: 1
- **Product Filters**:
- **Product Addons**:

*Note: You will receive email notification when product stock qty is below or equal to threshold level and inventory tracking is enabled.*

Maximum 5 add-ons can be selected for a particular product.
Add a product - Step 3:

On step 3, Supplier needs to add the following information:

- Meta Tag Title
- Meta Tag Description
- Meta Tag Keywords
Add a product - Step 4:

On step 4, Suppliers need to add attributes for a product. Please find the screenshot below:

As per the above screenshot, there are following attributes available in an auto suggest list:

- Fabric
- Keyboard
- Length
- Material
- Package Contents
- Pointer Device
- Power Supply
- Type
- Wash Care
- Color

These attributes will display on the product details page below the Shipping & Policies tab. Please find the screenshot below for reference:
**Note:** Only admin can new **Attributes** and **Attribute groups** from admin area. A vendor can select an attribute from the auto suggest list of attributes.

General Feature is Attribute Group.

**Fabric, Package Contents, Type and Wash care are attributes**

<table>
<thead>
<tr>
<th><strong>GENERAL FEATURES</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Fabric</td>
<td>Metal</td>
</tr>
<tr>
<td>Package Contents</td>
<td>Tie (cufflink &amp; pocket square)</td>
</tr>
<tr>
<td>Type</td>
<td>Tie Cufflink Combos</td>
</tr>
<tr>
<td>Wash Care</td>
<td>Wipe with a dry, clean cloth when needed</td>
</tr>
</tbody>
</table>
Add a product - Step 5:

On step 5 Suppliers need to fill up the following options for a product:

As per the above screenshot there are following Options are available like: Color, Length, Size, Additional Information etc. After select an option, it will add a row for select option values available in the system. Please find the screenshot below:
On clicking of icon it will add more sub-options under an option. As per the above screenshot, on clicking of icon, supplier can add more colors under Color option. On clicking of icon it will delete a particular option color added for a product.

On clicking of icon, Supplier can delete an option for product. Please find the screenshot below:

OR

Supplier can create a new option by clicking on Create new option/variant.

Supplier needs to add the following details for creating a new option:

- Type
- Name
- Display Order

When supplier clicks on save changes, new option/variant will be added as per the details.

Add a product –Step6:

In step 6, Supplier needs to fill up the following info to add quantity discount for a product:

- Quantity
- Priority
- Price (Discounted Price)
- Date Start
- Date End

Please find the screenshot below:
On clicking of + button, it will display the fields for adding a special discount for a product. Please find the screenshot below:

<table>
<thead>
<tr>
<th>Quantity</th>
<th>Priority</th>
<th>Price [$]</th>
<th>Date Start</th>
<th>Date End</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>0</td>
<td>100</td>
<td>2015-09-01</td>
<td>2015-09-30</td>
</tr>
</tbody>
</table>

On clicking — icon it will delete the particular discount associated with that product.
Add a product – Step 7:

Under the special tab, supplier needs to add the following information about the special discount:

- Priority
- Price
- Date Start
- Date End

On clicking of + button, it will show the fields for adding a **special discount** for a product. Please find the screenshot below:
On clicking of icon it will delete the particular **Special** discount associated with that product.

Please find below the screenshot regarding the product details page:
11. Shop

On clicking 📩 icon, Supplier will be redirected to the conversation page. On this page supplier can send a message to Buyer regarding his request. Please find the screenshot below:
On clicking **Approve Refund** button, amount will be refunded to buyer.

Note: If Vendor wants to escalate this dispute to YoKart then he/she can do the same on clicking **Escalate to YoKart** button.
15. Change Password

On this page supplier can change password for his/her account. Please find the screenshot below:

Supplier has to fill up the following fields to change his/her password:
- Current Password
- New Password
- Confirm New Password

Fields with asterisk (*) sign are mandatory fields.

16. Change Email

On this page supplier can change email for this account. Please find the screenshot below:

Supplier has to fill up the following fields to change his/her email:
- New Email
- Confirm Email

Fields with asterisk (*) sign are mandatory fields.
17. Import/Export

In this section Seller can easily Import/Export products. Select can select the Export/Import link in left menu panel. Please find the screenshot below:

Following are the list of information which is available for export:

- Categories
- Products
- Option definitions
- Attribute definitions
- Filter definitions
- Shipping definitions
- Shipping Companies

**Categories**

To import/Export categories, seller can select **Category** option. Please find the screenshot below:
• **Products**

To Export products, seller can select **Products** option. Please find the screenshot below:

Select this option to export products
• **Option Definitions**

To Export list of options, seller can select **Option Definitions** option. Please find the screenshot below:
• Attribute Definitions

To Export attributes, seller can select Attribute Definitions option. Please find the screenshot below:

Select this option to export attributes
• **Filter Definitions**

To Export list of filters, seller can select *Filter Definitions* option. Please find the screenshot below:

![Screenshot of Filter Definitions](image)

Select this option to export filters
• **Shipping Durations**

To Export list of filters, seller can select **Shipping Duration** option. Please find the screenshot below.
• Shipping Companies

To Export products, seller can select **Shipping Companies** option. Please find the screenshot below:

[Image of the Yolkart Multivendor System interface showing the 'Shipping Companies' option in the 'Bulk Import - Export' section]

Select this option to export list of Shipping Companies
• Brands

To Export list of brands, seller can select **Brands** option. Please find the screenshot below:

![Screenshot showing the export option for brands](image-url)
• Products Stock and SKU

To Export products stock and SKU, seller can select **Products Stock and SKU** option. Please find the screenshot below:

Select this option to export the products stock and SKU
• Import

Following options are available to Import products:

- Yes (Update and/or add data)

On select this option, Admin can update or add products through CSV file.

System will compare the products id with CSV file, existing products will be updated and others products will be added in the system.
- No (Delete all old data before import)

In this process, firstly system is removing the details of existing product and adding the details mentioned in the CSV file.

Select this option to upload product and delete old products.

Select spreadsheet file to upload
• Settings

On the settings page, seller can select setting to Import/Export information from database. Please find the screenshot below:
- Use **collection_id** instead of **collection Name** in worksheets 'categoryCollections'
  You can check this to Import/Export collection id instead collection name.

- Use **added_by_id** instead of added by (user name) in worksheets 'Products'
  You can check this option to Import/Export id of the user who added this product.

- Use **brand_id** instead of brand name in worksheets 'Products'
  You can check this option to Import/Export brand_id in place of brand name.

- Use **shop_id** instead of shop name in worksheets 'Products'
  You can check this option to Import/Export shop id instead shop name

- Use **option_id** instead of option name in worksheets 'ProductOption' and 'ProductOptionValues'
  You can check this option to Import/Export option id instead option name

- Use **option_value_id** instead of option_value name in worksheet 'ProductOptionValues'
  You can check this option if you want to Import/Export option value id instead option value.

- Use **attribute_group_id** instead of attribute_group name in worksheet 'ProductAttributes'
  You can check this option to import/export attribute group id instead group name.

- Use **attribute_id** instead of attribute name in worksheet 'ProductAttributes'
  You can check this option to import/export attribute_id instead attribute_name

- Use **filter_group_id** instead of filter_group_name in worksheets 'ProductFilters' and 'CategoryFilters'
  You can check this option to import/export filter_group_id instead filter_group_name

- Use **filter_id** instead of filter name in worksheets 'ProductFilters' and 'CategoryFilters'
  You can check this option to import/export filter_id instead filter_name

- Use **country_id** instead of country name in worksheets 'Products' and 'ProductShippingRates'
  You can check this option to import/export country_id instead country_name
This settings is for products worksheet and product shipping rates worksheet

- **Use company_id** instead of company name in worksheets 'ProductShippingRates'
  You can check this option to import/export company_id instead company_name

- **Use duration_id** instead of duration name in worksheets 'ProductShippingRates'
  You can check this option to import/export duration_id instead duration_name

- **Use phpTemp cache for large Exports (will be slightly slower)**
  You can check this option to cache the spreadsheet during exporting process.

- **Use phpTemp cache for large Imports (will be slightly slower)**
  You can check this option to cache the spreadsheet file during importing process
